QuickTox[®] Drug Screen Dipcard is now CLIA-Waived!

December 14, 2006

Branran Medical Corporation is pleased to announce that the QuickTox[®] Rapid Drug Screen has been awarded **CLIA-Waived** status. **CLIA-Waived** status indicates that the test is easy enough to be used by both laboratory and non-laboratory personnel. Now the QuickTox[®] can be used at all sites including treatment centers and hospital laboratories without having to follow CLIA Guidelines.

CLIA-Waived status demonstrates not only that the QuickTox[®] is simple to use but is also reliable and accurate enough to pass the rigorous requirements of CLIA-Waived classification.

QuickTox[®] is a one-step test for the rapid detection of 5 to 11 drugs of abuse. QuickTox[®] requires no instrumentation or accessory supplies. To use QuickTox[®], just uncap the device and dip it into a specimen cup for approximately ten seconds. Re-cap the device and lay it on a flat surface. The test results are available within 5 minutes or less and include an internal procedural control. Results of the QuickTox[®] can be read for up to one hour and can be easily copied or photographed to maintain a permanent record.

QuickTox[®] is available 25 devices per box, and in configurations of 5 to 11-drugs depending on the needs of your facility. QuickTox[®] has an 18-month shelf life when stored at room temperature (59°-86°F).
